- TimeSync..... 3
- Network and Wifi..... 3

1.ThunderInterface changes in R4 (up to release 4.3)

- **OCDM changes**

The OCDM Interface was extended for: CBCS support, resolution support, stream type support and clear type mapping

- **TimeSync**

The TimeSync interface was extended for TimeZone support

- **Network and Wifi**

A C++ header interface file was introduced for both of them from which both the COM RPC and JSON RPC interfaces are generated. So no longer a meta json file is used.
